

Amendments to the Specification:

Please replace the paragraph [0033] with the following rewritten paragraph:

[0033] As noted above, the containment border may be applied via a pen, or pen-like device, an example of which is shown in Figure 7. The pen is designated by reference number 50 and comprises a body 52 having a reservoir therein (not shown) which contains a quantity of the liquid composition comprising a coating material described elsewhere herein (e.g., polysiloxane). The pen 50 further comprises an applicator end 54, and a cap 56 for inhibiting evaporation of the coating material or drying of the tip 54. The pen 50 or cap 56 may comprise means for clipping, e.g., to a pocket. The applicator end may be a brush, a swab (~~comprising an absorbent material~~), a rubber tip, or any other device known to one of ordinary skill in the art of applicator pens.
